CONNECTED-PRODUCT CYBERSECURITY

PandaX

Every release.
Evidence ready.

A shared compliance workspace for
manufacturers selling connected products in the EU.

WHY NOW

11 SEP 2026

CRA reporting obligations begin

11 DEC 2027

Main CRA obligations apply

CONCEPT / VALIDATION STAGE

CPO / PRODUCT

One product. Every release. One evidence trail.

Connected-product compliance, handled end to end.

01

Generate the SBOM

connect your firmware/software build; we produce the Software Bill of Materials, which is the foundation for everything.

02

Monitor for threats

We continuously check those components against live vulnerability feeds and alert the moment one becomes a real, exploitable risk.

03

Generate & send reports

When a flaw appears, we draft the required 24h/72h/14-day notifications and file them to ENISA — and keep the technical file and Declaration of Conformity ready for CE marking.

From firmware binary to immutable CRA evidence.

Automated off-device engine: unpack firmware, eliminate false-positive CVEs, and lock compliance proof.

01 DECONSTRUCT

Software Inventory (SBOM)

- **Firecracker microVM:** Instant 5ms disposable sandbox safely unpacks untrusted code
- **Unblob Extraction:** Carves raw closed binary blobs (.bin) into open filesystem files
- **OWASP cdxgen:** Catalogs all software packages into the official ingredient list (SBOM)

→ OFFICIAL OUTPUT
Certified SBOM List
Digital component ingredient list

02 PROVE & MONITOR

Reachability Proving (Core Moat)

- **LIEF Call-Graph CFG:** Traces function paths to prove uncalled library bugs are dead code
- **CISA KEV + OSV Feeds:** Continuously checks customer libraries against active exploit lists
- **OASIS CSAF 2.0 VEX:** Generates machine-readable proof that clears 80%+ of false alarms

→ OFFICIAL OUTPUT
VEX Justification Report
Clears 80%+ false alarms

03 DISCLOSE & RETAIN

10-Year Audit Vault & SLAs

- **Temporal Workflow Engine:** Coordinates 24h/72h EU filings & escalations so deadlines aren't missed
- **Typst:** Compiles raw test data into the mandated EU Annex VII audit format
- **AWS WORM Vault:** Locks proof so nobody can alter or delete it for the mandatory 10 years

→ OFFICIAL OUTPUT
EU Compliance File
10-year tamper-proof legal record

ZERO RUNTIME OVERHEAD: 100% off-device cloud analysis. . • **STATUTORY GATES:** Automates Article 14 24h/72h EU alert deadlines & 10-year WORM audit retention.

CMO / MARKETING

And now, the CMO presents:

CMO / MARKETING

Start narrow. Earn industrial trust.

First market: German industrial and electrical-equipment manufacturers with connected products.

50–1,000

employees in our target segment

USER / CHAMPION

Product security or compliance manager

BUDGET OWNER

Engineering or quality leadership

01

TARGETED OUTREACH

A launch or reviewer request

02

PAID EVIDENCE SPRINT

One product • two weeks

03

REVIEW TOGETHER

Customer + lab or consultant

04

ANNUAL SUBSCRIPTION

Expand to the next release

Proposed edge: reviewer-friendly evidence across existing tools. Competing CRA offers include ONEKEY and Finite State. Research pp. 21–23; sources in notes.

CEO / MONETIZATION STRATEGY

Monetize recurring product evidence—not one-off advice.

Land with a bounded readiness sprint, convert to annual SaaS, and expand with product complexity.

REVENUE CORE

ANNUAL SAAS

Active product families • maintained releases • lifecycle workflow

ENTRY MOTION

PAID SPRINT

Bounded onboarding • baseline evidence pack • clear conversion point

EXPANSION

ADD-ONS

Multi-entity • integrations • retention • deployment • reviewer network

PRICING LOGIC	**Value, not seats**	Unlimited core users • align fees with portfolio breadth and recurring release workload
SERVICES ROLE	**Enable adoption—not dependence**	Partners handle specialist work
MARGIN MODEL	Keep scanning and lab work pass-through or partner-billed; avoid fees tied to conformity outcomes.	

Monetization strategy from decision memo pp. 19–21 • Annual SaaS + bounded services • Product family is the primary value unit; releases measure recurring workload.

Thank you

for listening.
